

Görkem Alyağut

Computer Engineer / Software Developer

Eager to learn and goal-oriented, Flutter developer with nearly 2 years of experience with Dart. Able to work well independently or as a part of a team with a good communication skills and awareness of their responsibilities. Good knowledge on Data Structures, OOP, Analysis and Algorithms through University lectures. Researching mobile applications and try a few apps, I liked this area and made an effort. After then, I found an internship company related to mobile applications and developed myself further. Therefore, looking for a job to gain new experiences while developing myself. Also, I know introductory HTML/JS/CSS and React JS. I'm currently learning Flutter and developing applications. Depending on the position to be given to me, I can take different pieces of training and improve myself rapidly. That's why I am open to any position.
